.JET PRINTING SYSTEM

- The .JET printing system is based on HP's TIJ printing technology, providing high flexibility, maximum quality and no maintenance.
- It consists of a main module to which up to 4 printheads can be connected, each printhead can print a width of 12.7 mm, with a resolution of up to 600 x 600 dpi, using standard HP format ink cartridges (42 ml).
- It can print any type of standard characters, logos, symbols, as well as one or two-dimensional barcodes, (Data Matrix, PDF 417, etc.), on all types of porous materials, or aluminium with the appropriate treatment, also on other types of non-porous materials using special inks.
- Can be integrated via Ethernet with the rest of Invescontrol systems.
- Printing speed of up to 300 metres/min:

600 x 600 dpi > 0.7 m/sec.	600 x 150 dpi > 2.8 m/sec.
600 x 300 dpi > 1.4 m/sec.	600 x 100 dpi > 4.2 m/sec.
600 x 200 dpi > 2.1 m/sec.	600 x 75 dpi > 5.6 m/sec.
- User friendly interface, ease of use.
- Touch screen operator panel with possibility to manage different devices.
- Optional module 21 CFR part 11 - Annex 11.
- Validation documentation available, (DQ, OQ, IQ...).

CHARACTERS & BARCODES

Printing of 1D, 2D codes and all types of characters, symbols, etc.

ETHERNET CONECTION

Can be integrated via Ethernet with other Invescontrol Invescontrol systems.

HIGH SPEED

Printing speed up to 300 metres/min.
